Stamps without gum

A large number of Brazilian stamps & M/S between SG1210 & SG1425 were issued without gum [ng].
These stamps, in the condition in which they were issued, are listed as MUH.
Where they have been hinged, they are listed as Mint.
Where they have been obviously washed, they are listed as MNG.
The MNG category is almost exclusively for stamps which were issued **with** gum
but which has been washed off.
The paper used for most of these stamps is glossy on the front and back
often giving the illusion that they are gummed when, in fact, they are not.
All other stamps & M/S are issued with gum, unless otherwise stated.

(	indicates an airmail issue
(	indicates some of the set are airmail issues
☐	imperforate
g	issued with gum
ng	issued without gum
o	ordinary paper (dead or whitish under UV)
p	phosphorised paper (yellow green under UV)

					Early definitive stamps of Brazil often were issued on paper with a variety of watermarks. For single stamps, especially those with postmarks, these watermarks are extremely difficult to differentiate. Consequently, for these issues, we provide a simplified listing only. Where we are able to unambiguously identify specific watermarks, we list the stamps we have with these.

					Commencing with SG647, and finishing on 30.5.49, definitives were issued with or without 3 vertical green control lines on the reverse of the stamp. Used copies of stamps with control lines are usually more expensive than their line-free counterparts. These stamps usually also exist on thick & thin papers.
