LEGEND

Paper
Ab = Abitibi
APP = Ashton Potter Paper
C = Coated (creamy from back)
CLP = Clark paper
CPL = Coated Papers Ltd
F = fluorescent paper; HF = high fluorescence; LF = low fluorescence
FCP = fluorescent coated paper
FP = Fasson Paper
H = Harrison (greenish gum)
HP or HB = hibrite [hi-brite, hybrite] paper (very bright under UV)
JAC = self adhesive (peel 'n stick)
P = Petersborough (white from back; greenish gum)
PL = plain uncoated (non-fluorescent) paper; also called DF (dull fluorescence)
RP = Rolland Paper (white gum)
S = Slater (cream coloured gum)
TRP = Tullis Russell Paper (coated); imprints show "C"

Fluorescence Scale

NF	no fluor (coated NF paper)
DF	dull fluor (uncoated NF paper)
PL	plain
LF	low fluor
F	fluorescence
MF	medium fluor
HF	high fluorescence
HB	hibrite
SF	speckled fluoresence

BABN = British American Bank Note Company
CBNC = Canadian Bank Note Company
LM = Leigh Mardon
LWM = Lowe-Martin Corporation; LMG = Lowe-Martin Group
R = Rolland

Ink
FK fluorescent ink

Tagging
Tagging = Canadian usage for phosphor
GT = general tagging = phosphor with fluor additive (yellow/green)
GT3 = general tagging with 3 fluor bars
GT4 = general tagging on each side of stamp
WT = Winnipeg Tagging = phosphor
WTCB4 = Winnipeg tagging with 4mm centre (single) phosphor band
OP4 = early unstable (migratory) tagging, later replaced with OP2
OP2 = stable tagging (later nomenclature = GT)

Under UV:
GT (OP2 & OP4) has no afterglow (fluoresence)
WT has afterglow (phosphoresence)

Perfs
Until recently, stamps from booklets were usually guillotined, whereas the corresponding sheet stamps were perforated.
Also, early Canadian sheets had guillotined edges.
Both sources produce sought after collectibles with straight edges.
SE = straight edge. We generically refer to these as "booklet stamps" although some are sheet stamps only.

Brightness
DF = dull fluorescence (uncoated)
HB = high brightness (hibrite paper)

See fluorescence scale above

Gum
DEX = dextrine (shiny yellowish) gum
PVA = poly vinyl alcohol (white, matt, almost invisible) gum
Davac = invisible gum

Colours
There is no universal colour format adopted by catalogue editors. Consequently, each have their own.
We follow SG.
However, many of the shades listed by SG are not listed by Scott/Unitrade.
In some cases, further shades are listed by Unitrade which are not listed by SG.
The universal lack of consistency and agreement on colours and shades makes cross-referencing a nightmare.
Consequently, although we have tried hard to match specific items, errors are likely.
We are unable to supply or obtain colour varieties. Most Canadian dealers use/supply simplified descriptions.

Catalogues
Stanley Gibbons, *Canada & Provinces; British Commonwealth & Empire Stamps*; *Stamps of the World*
Unitrade, *Specialised Catalogue of Canadian Stamps*
Darnell, *Stamps of Canada*
Darnell, *Canadian E.F.O.'s (Errors, Freaks & Oddities)*
McCann, *Standard Catalogue of Canadian Booklet Stamps*
Harris, *Definitive Series*, Vol 1 (1967-73) , Vol 2 (1972-78), Vol 3 (1977-87), Vol 4 (1982-89), Vol 5 (1987-96), Vol 6 (1989-96).
Chung & Narbonne, *Canada Post Official First Day Covers*

Numbering System
We list by SG and cross-reference to Scott/Unitrade
Scott numbers are integers + lower case Arabic, eg 107b
Unitrade enhance the Scott numbers for specialist items which are shown in lower case Roman, eg 107iv
Catalogue numbers in italics, whether SG, Scott or Unitrade, are contrived by ourselves to further enhance the listing.
We add the "SE" suffix to a number to identify straight edged stamps
Many varieties listed above are not shown in SG, Scott/Unitrade, but are identified/listed by Darnell in their EFO Catalogue.
However, we do not use the Darnell numbering system.

COIL PAIRS

For MUH stamps, coil pairs are usually available at 2x the MUH single price. Please specify "pair" against each individual item required.

USED STAMPS

Since the 1960s, Canada Post has issued an ever increasing number of *se tenant* pairs, strips and blocks.
They are largely aimed at stamp collectors and have little / no commercial application.
Postal use of these stamps is almost exclusively as singles from these combinations, apart from occasional philatelic use by collectors.
Even Canada Post's FDCs split many of such blocks over one or more FDCs thus destroying the *se tenant* combination.
Consequently, where stamps were issued in *se tenant* pairs, strips or blocks, FU / Used prices are for a set of *SINGLE* stamps.
For collectors requiring Used items *se tenant*, when such items are in stock,
an asterisk (*) appears after the descriptor. They are used, not necessarily FU or CTO.
Canadian stamp suppliers do not grade used stamps according to the clarity of the postmark.
Consequently, postmarks are those as received in the mail -- mainly machine cancels. Many modern machine cancels are dot matrix.
Even Canada Post's FDCs are machine cancelled, many with slogan type cancels rather than CDS.

Typical FDC postmarks.
Wavy or straight line cancel.
Classed as Fine Used.

Furthermore, the use of steel die CDS cancellers is virtually non existent and Canada Post does not supply Used or CTO stamps.
Most hand cancellers are a large rectangular rubber die which produces a thick and uneven cancel, often in blue.
This is the Canadian cancellation world today! We just ask that you understand it. We do not ask you to like it!
We automatically supply the best postmarks from our Fine Used or Used stocks. The FU / Used classification is judgmental.
Remember that with older issues, the objective of postmarking was to obliterate the stamp, as a protection against fraud --
not just lightly cancelling one corner. Collectors can not realistically expect these issues to be postmarked with the commercially
contrived cancels of the postal administrations of the 1980's and 1990's.

Our previous Canadian supplier has closed their business.
Consequently, we no longer have a Canada supplier and are unable to source stamps or have stamps cancelled.

CENTRING
For stamps prior to QEII, there will be a premium for collectors requiring well centred copies. Well centred stamps for this era were the exception, not the norm.
The premium varies between 100% and 300%, depending on the issue & availability; ie price is 2x - 4x the indicated price.
