POSTMARKS
We do not have the expertise to authenticate the genuineness of postmarks.
We believe them to be genuine but they have not been authenticated.
This is an era for which forgeries abound.
For those customers who wish to have a postmark expertised, they must advise us of such at the time of purchase.
We will then allow a reasonable (not indefinite) time for the expertising process.
All costs of expertising are those of the purchaser.
In the event that the cancel proves to be not genuine, we offer a full money back refund for the item(s) in question. We do not refund postage costs.
Written expertising evidence must be provided to us before a refund is paid.

DANZIG POSTMARKS
Many stamps of Danzig are catalogued by Michel as CTO or commercially used.
Commercially used stamps sell at substantial premiums over their CTO counterparts, often over 100x.
Used stamps in this list are priced as CTO, even though many are obviously commercially used.
However, sometimes the distinction is problematic.
Consequently, all used stamps are priced as if CTO.

To find an item in this list, please use Adobe's powerful search function.

We obtain our stock from collections we purchase.
We do not have a Germany supplier.

We list all items we have in stock, including broken sets, and singles from sets.

Prices subject to change without notice.

USED STAMPS
For used stamps, most collectors of Germany want "socked on the nose" cancels to ensure genuineness.
Thus the FU / Used categorisation is problematic.
Fine used stamps have light circular or machine cancels and are defect free.
Used stamps are those with heavier postmark, or minor flaws, eg pulled perf.

Please note that GST (currently 10%) is applicable from 1 July 2000.
International sales are GST free.

				CORK CANCELLATIONS					
				In the early part of the 20th century, a variety of cancellers, fashioned from corks, were officially used by German postal officials to obliterate stamps used on parcels to ensure their non-reuse. These stamps may already have been postmarked. This procedure was also followed by other countries such as the United States of America, Canada and the United Kingdom, for the same reasons. Crudely made, the cancellers were most frequently in the shape of blobs, bars or more elegant cross or star patterns. As they were individually hand made, each canceller is unique. They are of significant interest to many stamp collectors. The practice was discontinued in the 1930's.
