Flight Covers: Overseas
Space / Rocket Covers: Australia
Space / Rocket Covers: Overseas

OTHER MISCELLANEOUS: Paquebot / Tin Can Mail

POSTMARK REFERENCE NUMBERS are to the definitive reference work by **Colleen A Woolley assisted by Janet S Eury** titled **"Australian Pictor-Marks: A graphic history of Australia's Pictorial and Commemorative Postmarks" Edition 2, 2013**. Volume 1 1879-1989; Volume 2 1990-2012.
This 2 volume set is an indispensable tool which no serious cover and/or postmark collector can be without.
It is the definitive reference on Australian pictorial & commemorative postmarks.
Annual supplements were issued, however, the book and supplements are no longer produced. Those that were are out of print.
We have retained the old Peck numbers only because they are there. Correctly, we believe, they have been deleted from the 2nd edition of APM as they have outlived their usefulness as a transition to the new APM numbers.

						FLIGHT COVERS	

LEGEND AAMC = Australian Air Mail Catalogue, 6th edition 1997, by Nelson Eustis.
P = Plain (unillustrated) cover A = addressed cover (relevant for some decimal covers)

Flight covers are generally addressed, apart from some modern Australia Post items. They also reflect their age, the conditions under which they were carried and the addressing capabilities of the day. Only modern covers are specially printed. Most items pre 1966, and some of the early decimals, are on plain covers. These have been identified only when considered necessary.
